**UNDERGRADUATE TEXTS IN CONTEMPORARY PHYSICS**

As soon as one applies the mathematical concepts to real-world situations, one encounters the impossibility of finding a solution in "closed form" One is thus forced to use approximations and numerical methods of calculation Computer algebra is especially suited for many of the examples and problems in this book

**Differential Transform Method for system of Linear ...**

In this paper, we study Differential Transform Method is applied for solving system of Linear Differential Equations The approximate solution of the equation is calculated in the form of series with easily computable component This Powerful method catches the exact solution Some linear Differential Equations are solved as numerical examples
