This book constitutes the refereed post-proceedings of the 12th International Monterey Workshop on Networked Systems with special focus on realization of reliable systems on top of unreliable networked platforms, held in Laguna Beach, CA in September 2005. Coverage includes model-based software development of network-centric system-of-systems, foundations of future design and programming abstractions, and intelligent and robust middleware.

Hatchback & Sport Tourer (Estate). Does NOT cover Laguna III model range introduced Oct 2007. Petrol: 1.6 litre (1598cc), 1.8 litre (1783cc) & 2.0 litre (1998cc). Does NOT cover models with 2.0 litre iDE, 2.0 litre turbo or 3.0 litre V6 engines. Turbo-Diesel: 1.9 litre (1870cc), 2.0 litre (1995cc) & 2.2 litre (2188cc).

**SUNDAY TIMES BESTSELLER** Some people are born to be a certain thing. And I was a born fighter. At the age of eight, Michael Bisping began his training in martial arts. By the time he was 15, he was fighting in his first no holds barred competition. When he turned professional and joined the UFC he was sure about one thing: only a world championship title would do. A British underdog in the greatest fighting championship on earth, he spent the next decade winning some of the championship's most sensational contests to achieve his dream, becoming the first ever British UFC world champion in 2016. From his boyhood years learning to fight in the gyms of Lancashire to his most shocking clashes in the cage, in *Quitters Never Win* Bisping tells the raw and unfiltered story behind his legendary career for the first time, including his greatest wins, his fiercest rivals and the harrowing injury that forced him into retirement. As audacious, entertaining and as candid as the man himself, it's a backstage pass to one of the world's most extreme sports and an unbridled account of what it really takes to become a champion, from sleeping in his own car to reaching the summit of the world's fastest growing sport.

The objective of this volume is to showcase the contemporary state of research on recognizing and evaluating the performance of stone age weapons from a variety of viewpoints, including investigating their cognitive and evolutionary significance. New archaeological finds and experimental studies have helped to bring this subject back to the forefront of human origins research. In the last few years, investigations have expanded beyond examining the tools themselves to include studies of damage caused by projectile weapons on animal and hominin bones and skeletal asymmetries in ancient hominin populations. Only recently has there been a growing interest in controlled and replicative experiments. Through this book readers will be updated in the state of knowledge through a multidisciplinary scientific reconstruction of prehistoric weapon use and its implications. Contributions from expert authors are organized into three themed parts: recognizing weapon use (experimental and archaeological studies of impact traces), performance of weapon systems (factors influencing penetration depth etc.), and behavioral and evolutionary ramifications (cognitive and ecological effects of using different weapons).

This Prius repair manual contains the essential information and know-how you need to take the mystery out of servicing the Toyota Prius with Hybrid Synergy Drive®. You'll find step-by-step directions from safely disabling the high voltage system to real-world practical repair and maintenance procedures and full-color technical training. Model and engine coverage: 2004 - 2008 Prius NHW20 and 1NZ-FXE Engines.

A vital guide to the frontlines of our fight against climate change and the scientific and technological innovations that will revolutionize the world. The United States' accelerated plans to combat the existential threat of climate change finally give reason to hope. In *Our Livable World*, research specialist and author Marc Schaus explores the incredible new green innovations in science and engineering that can allow us to avoid the worst repercussions of global warming as we work to usher in a sustainable, livable world. To beat a challenge the size of climate change, our solutions will have to be ambitious: solar thermal cells capable of storing energy long after the sun goes down, "smart highways" designed to charge your vehicle as you drive, indoor vertical farms automated to maximize crop growth with no pesticides, bioluminescent vines ready to one day replace our streetlights, jet fuel created

from landfill trash and next-generation carbon capture techniques to remove the emissions we have already released over the past several decades. Far from the geoengineering schemes of cli-fi action thrillers, real solutions are being developed, right this moment. Our Livable World features interviews with the innovators, real talk on the revolutionary technology, and a clear picture of a cleaner planet in the future. "An important book that shows the dawn of a new kind of environmental movement—an age where we invest in deeply creative and fascinating technical solutions that work in harmony with the Earth. Marc Schaus lays out the exciting future of environmental innovation before us." —Katie Patrick, author of How to Save the World

Modern transportation allows people, animals, and plants—and the pathogens they carry—to travel more easily than ever before. The ease and speed of travel, tourism, and international trade connect once-remote areas with one another, eliminating many of the geographic and cultural barriers that once limited the spread of disease. Because of our global interconnectedness through transportation, tourism and trade, infectious diseases emerge more frequently; spread greater distances; pass more easily between humans and animals; and evolve into new and more virulent strains. The IOM's Forum on Microbial Threats hosted the workshop "Globalization, Movement of Pathogens (and Their Hosts) and the Revised International Health Regulations" December 16-17, 2008 in order to explore issues related to infectious disease spread in a "borderless" world. Participants discussed the global emergence, establishment, and surveillance of infectious diseases; the complex relationship between travel, trade, tourism, and the spread of infectious diseases; national and international policies for mitigating disease movement locally and globally; and obstacles and opportunities for detecting and containing these potentially wide-reaching and devastating diseases. This document summarizes the workshop.

After the closest-fought season in F1 history, Sebastian Vettel became the youngest-ever World Champion. His car, the Red Bull RB6, the work of a team led by legendary F1 designer Adrian Newey, was the envy of the paddock, proving to be consistently faster than its rivals over the season. In this fascinating book, the Red Bull RB6 receives the Haynes Manual treatment, providing an unprecedented insight into the design, technology and engineering of an F1 car as well as the inner workings of Red Bull Racing.
