Climate change is a major problem,

generating both risks and opportunities that will have a direct impact on the economy and the financial sector. In recent years, climate change has threatened both the survival of the financial system and economic development. The growing occurrence of

extreme climate events combined with the imprudent nature of economic growth can cause unsustainable levels of harm to the financial sectors. On the other hand, it presents a range of new business challenges. In contrast to the most evident physical risks,

Companies are vulnerable to transformational risks that arise from the reaction of society to climate change, such as technological change, regulation and markets that can boost the cost of doing business, threats to the profitability of existing goods, or effects on

that is changing faster and becoming more uncertain and complex almost by the day, it's never been more important—or more difficult—to choose the right approach to strategy. In this book, The Boston Consulting Group's Martin Reeves, Knut Haanæs, and

Janmejaya Sinha

offer a proven method to determine the strategy approach that is best for your company. They start by helping you assess your business environment—how unpredictable it is, how much power you have to change it, and how harsh it is—a critical component of

getting strategy right.

They show how
existing strategy
approaches sort into

five categories—Be
Big, Be Fast, Be First,
Be the Orchestrator,
or simply Be

Viable—depending on
the extent of
predictability,

malleability, and

harshness. In-depth
