(6 days ago) Advertising and Promotion: An Integrated Marketing Communications Perspective George E Belch , Michael A Belch To effectively plan, implement, and evaluate Integrated Marketing Communications (IMC) programs, one must understand the overall marketing process, consumer behavior, and communications theory.

To effectively plan, implement, and evaluate Integrated Marketing Communications (IMC) programs, one must understand the overall marketing process, consumer behavior, and communications theory. Belch/Belch's Advertising and Promotion: An Integrated Marketing Communications Perspective draws from the authors' extensive research in advertising, consumer behavior, communications, marketing, sales promotion, and other fields to give students a basis for understanding the marketing communications process, how it influences consumer decision making, and how to develop promotional strategies. In addition to thorough coverage of advertising, Belch's eleventh edition has chapters on sales

promotion, direct marketing, the Internet including social media and mobile marketing, support media such as outdoor advertising, product placement and integration, and publicity/public relations, with emphasis on the integration of advertising with other promotional-mix elements and the need to understand their role and overall contribution.

The fourth edition of Advertising brings together an author team of highly experienced teachers and industry professionals to produce a learning resource that is both pedagogically sound and reflective of the most current industry practices. This new edition is fully revised to reflect the rapidly evolving advertising industry by beginning from the premise that everything is digital. To introduce students to the power of digital marketing, this edition contains two new chapters on Search and Analytics, which underpin all modern communication systems. A third new chapter on Integration and Synergy demonstrates how these tools can be brought together to form a measurable, customer-focused IMC plan.

Overview: Belch/Belch 9th edition continues its Advertising focus with an emphasis on IMC. It includes very comprehensive coverage of Agency issues and creative work and how it is related to the IMC mix. The authors understand that marketers must look beyond traditional media in order to achieve success. In order to best communicate with consumers, advertisers must utilize a myriad of tools (advertising, public relations, direct marketing, interactive/Internet marketing, sales promotion, and personal selling); Belch/Belch is the first book to reflect the shift from the conventional methods of advertising to the more widely recognized approach of implementing an integrated marketing communications strategy. The text underscores the importance of recognizing that a firm must use all promotional tools available to convey a unified message to the consumer. The integrated marketing communications perspective (the theme of the text) catapults the reader into the business practices of the 21st century.

Advertising and Promotion: An Integrated Marketing Communications Perspective, 6/e, by Belch and Belch, is the number one text in the Advertising market. As the field of advertising and promotion continues to dramatically change since the dominant days of high-powered Madison Avenue agencies, marketers must look beyond traditional media in order to achieve success. In order to best communicate with consumers, advertisers must utilize a myriad of tools (advertising, public relations, direct marketing, interactive/Internet marketing, sales promotion, and personal selling); Belch/Belch is the first book to reflect the shift from the conventional methods of advertising to the more widely recognized approach of implementing an integrated marketing communications strategy. The text underscores the importance of recognizing that a firm must use all promotional tools available to convey a unified message to the consumer. The integrated marketing communications perspective, (the theme of the text), catapults the reader into the business practices of the 21st century. AdSim is an Advertising Simulation set in the consumer electronics industry where students are required to make decisions about Agency selection; Brand positioning and messages; Media Selection, including traditional and non-traditional; Market Research, both ordering and interpreting; and Budgeting. This simulation, created by SmartSims, provides a highly engaging means of developing a real understanding and appreciation of the fundamentals and dynamics of communications, advertising and promotion in business. AdSim challenges students to apply recently learned concepts, principles and explained practices in development of overall communications, advertising and promotion campaigns, whether against the computer in the Single-Player version or in direct competition with their peers in the Multi-Player

version. AdSim for Belch is a learning companion to Advertising and Promotion: An Integrated Marketing Communications Perspective, 6/e by George and Micheal Belch and has been modeled on the contemporary US DVD-Player Market. Using this simulation, students will develop:

- An understanding of the factors involved in the development of an advertising and promotion in a highly competitive market.
- Insights into selecting different media for specific communications goals and target markets while being constrained by a fixed budget.
- Insights into the importance market and media research.
- Insights into the influence of brand awareness and on-going measurement.
- A better appreciation of the concepts of an integrated marketing communication approach.
- Critical decision-making and team participation skills in an interactive learning environment.

The integrated marketing communications perspective, (the theme of the text), catapults the reader into the business practices of the 21st century.
