An interdisciplinary cultural history of exploration and mountaineering in the nineteenth century European forays to mountain summits began in the late eighteenth and early nineteenth centuries with the search for plants and minerals and the study of geology and glaciers. Yet scientists were soon captivated by the enterprise of climbing itself, enthralled with the views and the prospect of "conquering" alpine summits. Inspired by Romantic notions of nature, early mountaineers idealized their endeavors as sublime experiences, all the while deliberately measuring what they saw. As increased leisure time and advances in infrastructure and equipment opened up once formidable mountain regions to those seeking adventure and sport, new models of masculinity emerged that were fraught with tensions. This book examines how written and artistic depictions of nineteenth-century exploration and mountaineering in the Andes, the Alps, and the Sierra Nevada shaped cultural understandings of nature and wilderness in the Anthropocene.

Not everyone is fortunate enough to live in a tropical paradise and dive all day. Most freedivers and spearfishers need to resort to cross training to keep in shape. Cross training is training with techniques from other sports to improve your diving. There are many exercises we can do on land to keep in shape. And in contrast to diving, cross training can be done no matter where you are, all year long. Longer and Deeper will teach you the most efficient exercises, how to schedule workouts and recovery, and how to keep track of your training.

In Beethoven's Symphonies - A Guided Tour, readers are treated to a detailed nuts-and-bolts description in easy-to-understand English of each of the nine Beethoven symphonies. This book is perfect for anyone who wants to learn more about Beethoven, and discover how this musical genius changed the face of orchestral music forever.

A disused church near a Welsh border hamlet has already been sold off by the Church when it's discovered that the new owners are pagans who intend to use the building for their own rituals. Rev. Merrily Watkins, the diocesan exorcist, is called in, unaware of a threat from a deranged man.

Pulling back the covers on the fascinating, yet often forgotten, history of the bed "If you thought that your bed was only good for sleeping in, having sex in, or dying in, then this book will disabuse you--in fact, it's so entertaining, it will keep you awake long into the night."--Paul Chrystal, author of In Bed with the Ancient Greeks and In Bed with the Romans Louis XIV ruled France from his bedchamber. Winston Churchill governed Britain from his during World War II. Travelers routinely used to bed down with complete strangers, and whole families shared beds in many preindustrial households. Beds were expensive items--and often for show. Tutankhamun was buried on a golden bed, wealthy Greeks were sent to the afterlife on dining beds, and deceased middle-class Victorians were propped up on a bed in the parlor. In this sweeping social history that covers the past seventy thousand years, Brian Fagan and Nadia Durrani look at the endlessly varied role of the bed through time. This was a place for sex, death, childbirth, storytelling, and sociability as well as sleeping. But who did what with whom, why, and how could vary incredibly depending on the time and place. It is only in the modern era that the bed has transformed into a private, hidden zone, and its rich social history has largely been forgotten.

THE CLIFFS AND MOUNTAINS WE LOVE CAN BE UNFORGIVING. READ ACCIDENTS IN NORTH AMERICAN CLIMBING TO LEARN FROM THE MISTAKES OF OTHERS, SO YOU CAN CLIMB AGAIN TOMORROW. Published annually by the American Alpine Club, Accidents in North American Climbing reports on each year's most significant and educational climbing accidents. In each case, rangers, rescuers, and other experts analyze what went wrong, helping climbers prevent or survive similar situations in the future. In-depth articles cover more topics, including avalanche safety for mountaineers and ice climbers.

A series of personal and historical encounters with surrealism from one of its foremost practitioners in the United States. "Penelope Rosemont has given us, better than anyone else in the English language, a marvelous, meticulous exploration of the surrealist experience, in all its infinite variety."--Gerome Kamrowski, American Surrealist Painter One of the hallmarks of Surrealism is the encounter, often by chance, with a key person, place, or object through a trajectory no one could have predicted. Penelope Rosemont draws on a lifetime of such experiences in her collection of essays, Surrealism: Inside the Magnetic Fields. From her youthful forays as a radical-student in Chicago to her pivotal meeting with André Breton and the Surrealist Movement in Paris, Rosemont--one of the movement's leading exponents in the United States--documents her unending search for the marvelous and the avant-garde. Surrealism finds her rubbing shoulders with some of the movement's most important visual artists, such as Man Ray, Leonora Carrington, Mimi Parent, and Toyen; discussing politics and spectacle with Guy Debord; and crossing paths with poet Ted Joans and outsider artist Lee Godie. The book also includes scholarly investigations into American radicals like George Francis Train and Mary MacLane, the myth of the Golden Goose, and Dada precursor Emmy Hennings. Praise for Surrealism: "When writing about André Breton and his friends, or about the marvelous surrealist women artists Toyen, Mimi Parent, Leonora Carrington or Jayne Cortez, Penny Rosemont is not delivering dry abstractions, as so many academic 'specialists,' but telling us about warm and exciting human encounters, illuminated by the subversive spirit of Permanent Enchantment."--Michael Löwy, author of Redemption and Utopia and Fire Alarm "This compelling and well-drawn book lets us see the adventures, inspirations, and relationships that have shaped Penelope Rosemont's art and rebellion."--David Roediger, author of Class, Race, and Marxism "Penelope Rosemont's remarkable life and legendary body of work lies centrally at the crossroads of surrealism then and now. The broad sampling of essays included here offer a compelling entry point for curious readers and an essential compendium for surrealist practitioners."--Abigail Susik, professor of art history, Willamette University "Artist, historian, and social activist, Rosemont writes from the inside out. Like a rare, hybrid flower growing out of the earth, she complicates, expands, and opens the strange and beautiful meadow where Surrealism continues to live and thrive."--Sabrina Orah Mark, author of Wild Milk "In this wide-ranging collection of essays, Penelope Rosemont, long a keeper of surrealism's revolutionary flame, shows how a penetrating look into the past can liberate the future."--Andrew Joron, author of The Absolute Letter "The looming centenary of Surrealism will be greeted by a boatload of publications, but few will be as heartfelt, spirited, and teeming with the atmosphere conjured by Penelope Rosemont. Her welcome memoir has a double virtue, as testament to the enduring radiance of Surrealism, and as a memento to the Sixties, revealing a sweetly beating wonderment at the heart of that absurdly maligned decade."--Jed Rasula, author of Destruction Was My Beatrice: Dada and the Unmaking of the Twentieth Century "Rosemont recreates the feverish antics and immediate reception her close-knit, sleep-deprived, beat-attired squad find in the established, moray-breaking Parisian and international surrealists. Revolution is here, between the covers."--Gillian Conoley, author of A Little More Red Sun on the Human: New and Selected Poems and translator of Thousand Times Broken: Three Books by Henri Michaux

A thoughtful exploration of how humans have endangered the Earth but can pull it back from the brink, as told by a renowned conservationist This personal and thoughtful book by renowned Kenya conservationist David Western traces our global conquest from Maasai herders battling droughts in Africa to the technological frontiers of California. Western draws on a half century of research in the savannas and his own life's journey to argue that conservation is not a modern invention. The success of all societies past and present lies in conservation practices, breaking biological barriers and learning to live in large cooperative groups able to sustain a healthy environment. Our ecological emancipation from nature enabled us to expand our horizons from conserving food and water for survival to saving whales, elephants, and our cultural heritage. In the Anthropocene, our scientific knowledge and modern sensibilities offer hope for combating global warming and creating a planet able to sustain the wealth of life, but only if we use our unique cultural capacity of cooperation to plan our future.
