In this new collection, Ben Bova has compiled fourteen of his favorite short stories. Each story includes an all-new introduction with

Dan Randolph never plays by the rules. A hell-raising

File Type PDF Ben Bova

Acting as a twenty-first privateer, Randolph broke the political strangle-hold

Hugo Award winner Ben Bova continues his grand tour of the human settled solar

File Type PDF Ben Bova

system with a fan-pleasing look at life in the Outer Planets, among the moons of Neptune. In the future, humanity has spread throughout the solar system, on planets and moons once visited only by robots or

File Type PDF Ben Bova

explored at a distance by far-voyaging spacecraft. No matter how hostile or welcoming the environment, mankind has forged a path and found a home. In the far reaches of the solar system, the outer planets—billions

File Type PDF Ben Bova

of miles from Earth, unknown for millennia—are being settled. Neptune, the ice giant, is swathed in clouds of hydrogen, helium, and methane and circled by rings of rock and dust. Three years ago, Ilona Magyr's

File Type PDF Ben Bova

father, Miklos, disappeared while exploring the seas of Neptune. Everyone believes he is dead—crushed, frozen, or boiled alive in Neptune's turbulent seas. With legendary space explorer Derek Humbolt piloting her

life in orbit. Kyle Umber, a religious idealist, has built Haven, a sanctuary above the distant planet Uranus. He invites "the tired, the sick, the poor" of Earth to his orbital retreat where men and women

File Type PDF Ben Bova

can find spiritual peace and refuge from the world. The billionaire who financed Haven, however, has his own designs: beyond the reach of the laws of the inner planets Haven could become the center for an

breathable oxygen-rich atmosphere. Eager to gain more information, a human exploration team is soon dispatched to explore the planet, now nicknamed New Earth. All of the explorers understand that they are

File Type PDF Ben Bova

essentially on a one-way mission. The trip takes eighty years each way, so even if they are able to get back to Earth, nearly 200 years will have elapsed. They will have aged only a dozen years thanks to

cryonic suspension, but their friends and family will be gone and the very society that they once knew will have changed beyond recognition. The explorers are going into exile, and they know it. They are on

File Type PDF Ben Bova

this mission not because they were the best available, but because they were expendable. Upon landing on the planet they discover something unexpected: New Earth is inhabited by a small group

File Type PDF Ben Bova

of intelligent creatures who look very much like human beings. Who are these people? Are they native to this world, or invaders from elsewhere? While they may seem inordinately friendly to the human explorers, what

File Type PDF Ben Bova

are their real motivations?
What do they want? Moreover,
the scientists begin to
realize that this planet
cannot possibly be natural.
They face a startling and
nearly unthinkable question:
Could New Earth be an
