The Skilled Craft Battery Test Passbook(R) prepares you for your test by allowing you to take practice exams in the subjects you need to study. It provides hundreds of questions and answers in the areas that will likely be covered on your upcoming exam, including but not limited to: reasoning; analyzing situations; problem solving; technical knowledge related to automotive, electrical, mechanical and/or technical work; and more.

This book focuses on the state-of-the-art developments in machining with nanomaterials. Numerous in-depth case studies illustrate the practical use of nanomaterials in industry, including how thin film nanostructures can be applied to solving machining problems and how coatings can improve tool life and reduce machining costs in an environmentally acceptable way. Chapters include discussions on, among other things: Comparisons of re-coated cutting tools and re-ground drills The modeling and machining of medical materials, particularly implants, for optimum biocompatibility including corrosion resistance, bio adhesiveness, and elasticity Recent developments in machining difficult-to-cut materials, as well as machining brittle materials using nanostructured diamond tools Spindle Speed Variation (SSV) for machining chatter suppression Nano grinding with abrasives to produce micro- and nano fluidic devices. The importance of proper design of cutting tools, including milling tools, single point turning tools, and micro cutting tools is reinforced throughout the book. This is an ideal book for engineers in industry, practitioners, students, teachers, and researchers.

This new edition of The 80x86 Family: Design, Programming, and Interfacing has been extensively updated to include material on the newest processors, including the Pentium II and III, the Xeon, the Itanium, and AMD's Athlon.

Simulation Using ProModel covers the art and science of simulation in general and the use of ProModel simulation software in particular. The text blends theory with practice. Actual applications in business, services and manufacturing and a hands-on approach to simulation, including real-world simulation projects, are emphasized. The third edition of Simulation Using ProModel reflects the most recent version of the ProModel software in all the examples and labs as well as expanded coverage on generating random variates and design of experiments. Additionally, the lead author is founder and Chief Technology Advisor for ProModel Corporation.

From New York Times bestselling author Sabrina Jeffries, the deliciously sexy fourth book in the "Duke's Men" Regency romance series—the first of which was called "a totally engaging, adventurous love story" (RT Book Reviews, Top Pick). The heir presumptive to the Viscount Rathmoor, Dominick Manton once had his heart's desire within reach—a bright future as a barrister and engagement to Jane Vernon, a wealthy baron's daughter. Then a shattering betrayal by his vindictive brother George snatched away Dom's inheritance and his hopes of offering Jane a secure future. Brokenhearted, and attempting to end their engagement without destroying Jane's reputation, Dom staged a betrayal of his own to convince her that he's not the husband-to-be that she thought. Now George is gone and the viscountcy restored to Dom, since his brother's widow, Nancy—Jane's cousin and closest confidant—never bore an heir. But when Nancy goes missing, a panicked Jane calls on her former fiancé to track down her cousin. Dom knows the mistakes of the past may be unforgivable—but now, entangled together in mystery and danger, will they rekindle a passionate longing that was never lost to begin with?

Constructed as a set of simple-to-follow, step-by-step instructions, this book will take you through numerous aspects of creating a fully functional media center with your Raspberry Pi. It is an easy-to-follow yet comprehensive guide to setting a complete media center experience using the revolutionary ARM GNU/Linux board. This book does not require any prior knowledge of the Raspberry Pi, but it does assume you are computer literate and comfortable with Mac OS X, Linux, or Windows and concepts such as installing software.
