El material de este libro forma parte del curso de Aula Mentor dedicado a las herramientas que Internet proporciona a través de licencias abiertas y gratuitas para ofrecer soluciones a los usuarios en el uso de los equipos informáticos. Desde operaciones como la virtualización, la seguridad, la manipulación de archivos, el audio y el vídeo digital, pasando por la informática gráfica, la ofimática e incluso el aprendizaje de idiomas.

Libro de texto para la impartición de la materia de Tecnologías de la Información y Comunicación en 3º y 4º de la ESO. Está especialmente pensado para que sea práctico, sin excesivas explicaciones teóricas, con el fin de que el alumnado pueda realizar de forma autónoma todas las actividades que se proponen. Cada unidad didáctica comienza con una breve introducción teórica. Después se proponen prácticas guiadas y, finalmente, actividades de aplicación de lo aprendido. El/la profesor/a se encargará de evaluar cada una de las prácticas y ejercicios realizados para poder calificar la unidad. Adicionalmente, se podrá plantear un examen para comprobar el grado de asimilación de las competencias.

It is our pleasure to welcome you to the proceedings of the 13th International Computer Society of Iran Computer Conference (CSICC-2008). The conference has been held annually since 1995, except for 1998, when it transitioned from a year-end to first-quarter schedule. It has been moving in the direction of greater selectivity (see Fig.1) and broader international participation. Holding it in Kish Island this year represents an effort to further facilitate and encourage international contributions. We feel privileged to participate in further advancing this strong technical tradition.

This book is for system administrators and security professionals who need to bring now ubiquitous IM and P2P applications under their control. Many businesses are now taking advantage of the speed and efficiency offered by both IM and P2P applications, yet are completely ill-equipped to deal with the management and security ramifications. These companies are now finding out the hard way that these applications which have infiltrated their networks are now the prime targets for malicious network traffic. This book will provide specific information for IT professionals to protect themselves from these vulnerabilities at both the network and application layers by identifying and blocking this malicious traffic. \* A recent study by the Yankee group ranked "managing and securing IM and P2P applications" as the #3
