What made the Sopranos finale one of the most-talked-about events in television history? Why is sudoku so addictive and the iPhone so darn irresistible? What do Jackson Pollock and Lance Armstrong have in common with theoretical physicists and Buddhist monks? Elegance. In this thought-provoking exploration of why certain events, products, and people capture our attention and imaginations, Matthew E. May examines the elusive element behind so many innovative breakthroughs in fields ranging from physics and marketing to design and popular culture. Combining unusual simplicity and surprising power, elegance is characterized by four key elements: seduction, subtraction, symmetry, and sustainability. In a compelling, story-driven narrative that sheds light on the need for elegance in design, engineering, art, urban planning, sports, and work, May offers surprising evidence that what's inot there! often trumps what is. In the bestselling tradition of The Tipping Point, Made to Stick, and The Black Swan, In Pursuit of Elegance will change the way you think about the world.

This fantastic overview of points, lines, angles, planes, solids and space figures is great for middle and high school students. It will help boost math confidence and test scores.

In this book, philosopher Keekok Lee challenges one of the central assumptions of contemporary environmentalism: that if we could reduce or eliminate pollution we could 'save' the planet without unduly disrupting our modern, industrialized societies. Lee argues instead that the process of modernization, with its attendant emphasis on technological innovation, has fundamentally transformed 'nature' into just another manmade 'artefact.' Ultimately, what needs to be determined is if nature has value above and beyond human considerations, whether aesthetic, spiritual, or biological. This provocative book attempts to reconfigure environmental ethics, positing the existence of two separate ontological categories-the 'natural' and the 'artefactual.' Natural entities, be they organisms or inert matter, are 'morally considerable' because they possess the ontological value of independence, whereas artefacts are created by humans expressly to serve their own interests and ends.

Being an adult has its advantages... Lucas Abbott and his identical twin grew up sharing everything—including a reputation for funny, idiotic behavior. But now that Lucas is ready to shed that lovable-idiot image, grow up and have a real, adult relationship, the joke's on him. He and his twin have fallen for the same woman. Crushed and hoping a few days on the slopes will work out his frustrations, he heads for Stowe, Vermont. All thought of fun and relaxation flies away as a car spins out in a snowstorm, and his firefighter/paramedic training kicks into high gear. Danielle Rowson is hoping to pick up the pieces and build a new life for herself and her daughter in Vermont. Winding up in a ditch in the middle of a blizzard isn't part of the plan!and neither is the kind, sexy rescuer whose strong hands pull them to safety. Lucas has been a little kid, a big kid and now an adult!and he discovers that adulting has more than one advantage. Especially when it comes to sharing with Dani and Savannah the one thing that's his and his alone: his love.
