Nearly the whole of America 's partisan politics centers on a single question: Can markets solve our social problems? And for years this question has played out ferociously in the debates about how we should educate our children. From the growth of vouchers and charter schools to the implementation of No Child Left Behind, policy makers have increasingly turned to market-based models to help improve our schools, believing that private institutions—because they are competitively driven—are better than public ones. With The Public School Advantage, Christopher A. and Sarah Theule Lubienski offer powerful evidence to undercut this belief, showing that public schools in fact outperform private ones. For decades research showing that students at private schools perform better than students at public ones has been used to promote the benefits of the private sector in education, including vouchers and charter schools—but much of these data are now nearly half a century old. Drawing on two recent, large-scale, and nationally representative databases, the Lubienskis show that any benefit seen in private school performance now is more than explained by demographics. Private schools have higher scores not because they are better institutions but because their students largely come from more privileged backgrounds that offer greater educational support. After correcting for demographics, the Lubienskis go on to show that gains in student achievement at public schools are at least as great and often greater than those at private ones. Even more surprising, they show that the very mechanism that market-based reformers champion—autonomy—may be the crucial factor that prevents private schools from performing better. Alternatively, those practices that these reformers castigate, such as teacher certification and professional reforms of curriculum and instruction, turn out to have a significant effect on school improvement. Despite our politics, we all agree on the fundamental fact: education deserves our utmost care. The Public School Advantage offers exactly that. By examining schools within the diversity of populations in which they actually operate, it provides not ideologies but facts. And the facts say it clearly: education is better off when provided for the public by the public.

Should we stay or should we go? Millions of parents with children in public schools can't believe they're asking this question. But they are. And you should be asking it too. Almost overnight, America's public schools have become morally toxic. And they are especially poisonous for the hearts and minds of children from religious families of every faith—ordinary families who value traditional morality and plain old common sense. Parents' first duty is to their children—to their intellect, their character, their souls. The facts on the ground point to one conclusion: get out now.

" Greater is he who is in you than he who is in the world " (1 John 4:4). Taking this verse at face value provides the perfect opportunity to prove it in the educational setting of our children, say the authors of Going Public. By nurturing the life and power of Christ within them, students will be ready to stand against negative influences no matter the environment, even bringing light to a dark place. They will also benefit from many of the services that the often well-financed public school system has to offer. Readers of this practical guide will learn how moms and dads have a strategic role to play in the ongoing development of their school-age children. Discover what the Bible says about education, the three most important things to teach your public-school child, how to shape your child through teachable moments, the importance of getting involved at school and why everyone should " home-school, " in addition to public school.

"Public Schools, Public Menace" shows parents how public schools can seriously harm their children. He also tells parents about new, low-cost, quality education alternatives to give their kids a great education.

Confessions of a Public School Teacher: A 35-Year Veteran's Assessment on How Public Education Can Make the Grade By: Michael Marra A veteran teacher of 35 years, Michael Marra believes deeply in education 's power to change lives. His enthusiasm for helping children realize their full potential lies at the core of his lessons. His efforts to make history and economics classes relevant to students ' lives, both inside and outside the classroom, permeate his lively teaching style. Marra 's philosophy on how best to improve our public schools does not sit well with teacher unions. He believes strongly that tenure, seniority and near-endless due process protect poor performing teachers and need swift, meaningful revision. On this, Marra is unwavering, and he presents refreshing suggestions for unlocking what he believes have become the greatest shackles on American schools. Readers will be well informed to make their own assessment on these critical issues. Part memoir, part argument and part how-to guide for aspiring educators, Confessions of a Public School Teacher is a must-read for anyone who believes true learning and development to be worthwhile pursuits. Marra 's quest to leave the classroom a bit better than he found it is both his greatest support of those we cherish dearly—our children—and an invitation for the reader to join the conversation.

Why should you care about what happened to William Frantz Public School? Yes, Ruby Bridges entered the iconic doors of William Frantz in 1960, but the building's unique role in New Orleans school desegregation is only one part of the important history of this school. Many additional and equally important stories have unfolded within its walls and the neighborhoods surrounding it. These stories matter. It matters that society has historically marginalized Black students and continues to do so. It matters that attempts to dismantle systemic racism in schools and other institutions still face strong resistance, and these issues continue to deeply divide the United States. It matters that the building remains standing as an indomitable symbol of the resiliency of public education despite decades of waning support, misguided accountability, and a city devastated by Hurricane Katrina. It matters that opportunism, under the guise of recovery, reshaped public education in New Orleans. William Frantz Public School: A Story of Race, Resistance, Resiliency, and Recovery in New Orleansprovides more than an examination of education in one school and one city. It recounts a story that matters to anyone who cares about public education.

It's often said a child's lifelong love of reading begins at home. But declining literacy rates among the nation's public elementary school students suggests this maxim needs revision. For reading to become an everyday habit, it needs to be nurtured in a home of its own. Fortunately, there is space available inside most elementary schools. At just 5 percent of a school's total real estate, the school library is the most powerful and efficient way to reach 100 percent of the student body. But far too many of the nation's public school libraries lack even the most basic resources to support learning and encourage achievement. The nonprofit Library Initiative, created by the Robin Hood Foundation, has been working since 2001 to enhance student literacy and overall academic achievement by collaborating with school districts to design, build, equip, and staff new elementary school libraries. The Library Book takes readers behind the scenes of fifty groundbreaking library projects to show how widely varied fields and communities—corporate underwriters, children's book publishers, architects, graphic designers, product manufacturers, library associations, teachers, and students—can join forces to make a difference in the lives of children. Based on the premise that good library design can actually inspire learning, the Library Initiative brings together some of the world's leading architects to reimagine the elementary school libraries in New York City—the nation's largest public school system. Working on a pro bono basis, architecture firms—including 1100 Architects, Weiss/Mandredj Architects, Della Valle Bernheimer, Tod Williams Billie Tsien Architects, and Dean/Wolf Architects—have in just eight years built or transformed more than fifty libraries into vital resources for the whole school community. These libraries—both beautiful learning spaces and innovative architecture—feature a wide range of design solutions, including creative uses of space, color, lighting, and furniture. Author and former Library Initiative director Anooadha Yer Siddiqi documents every project with beautiful photos as well as renderings and measured drawings. The Library Book concludes with the chapter How to Make a Library which shows how community organizers and architects can pursue similar initiatives in their own communities.

This timely book outlines the growth and development of marketing and branding practices in public education. The authors highlight why these practices have become important across key fields within public education, including leadership and governance, budgeting and finance, strategic initiatives, use of new technology, the role of teachers in marketing, and messaging. From an organizational perspective, they explore the implications of advertising on the democratic mission of public education, especially as related to issues of equity and access for students who have been historically underserved. The authors argue that expansive marketing campaigns, unequal funding sources, and lack of regulation are quickly and profoundly reshaping public education without the benefit of robust research or public debate. Selling School is important reading for principals navigating increasingly marketized school systems, for policymakers constructing legislation, and for parents negotiating school choice. " DiMartino and Jessen are right in their prescient discussion of the muddling of public and private models in public education through marketing. " —From the Foreword by Christopher Lubienski, Indiana University, Bloomington " This book pioneers new ground as the authors move the literature on the marketization of education into a more nuanced analysis of how branding discourses and practices have entered the logic of public schooling. " —Gary L. Anderson, New York University " Essential for readers interested in learning about how private sector practices affect the functions of public schools. " —Janette Scott, University of California, Berkeley

This book is designed as a "building-block approach to understanding the financing of public schools in the U.S. The philosophical and historical basis for financing public schools is presented and integrated with the economic rationale for public investment in education.
