An Introduction to the Foundation Phase provides a practical guide to understanding and implementing the Foundation Phase in any early years setting in Wales. The experienced author team discuss and reflect upon a play based approach to learning and the importance of collaboration between various members in any early years settings. Students are introduced to key topics including: key theories of influential thinkers within early years education, both past and present; international curricula and perspectives on play and how Welsh curriculum compares; effective classroom practice; observational techniques; methods of assessment and how to be a reflective practitioner. Through interviews with different stakeholders, including educational ministers, policy advisors, practitioners and parents, An Introduction to the Foundation Phase concludes by discussing the challenges and complexities of putting policy into practice and considers implications for the future of early years education. Making links between theory, policy and practice is vital for a future workforce and this core text provides a solid foundation for any student within early years. Illustrative case studies, activities, reflective tasks and suggestions for further reading are provided throughout. Online resources for lecturers and students are also included.

Nursing is a career that attracts many people - there were 30,000 new nurses registered in the United Kingdom in 2002-03. Careers & Jobs in Nursing provides up-to-date information about the different types of nursing, what qualifications are needed, how to obtain them and how to apply for a nursing place. It will help you assess your skills and decide which area of nursing is right for you. It also provides information for nurses working overseas about how to register in the United Kingdom. There are real life case studies, expert tips and job sector summaries, plus advice on: entry routes and the application process the various types of nursing and their career pathways returning to nursing after a career break coming to work in the United Kingdom as a nurse if you live abroad With a wealth of essential contact details for both UK residents and international applicants, this book is essential reading if you are considering a career in nursing.

Nursing Practice and Health Care is an essential companion to pre-registration nursing education programmes, for those studying at degree and diploma level, and for students on post-registration courses. This fifth edition has been completely revised to reflect the current professional and educational requirements for those preparing for registration as a nurse, while maintaining a strong focus on practice and reflecting the needs of those requiring nursing and health care. Additionally, it uses the 2008 NMC Code as the cornerstone for many of its chapters. Building on the changes in the fourth edition, the requirements of pre-registration nursing programmes, the fitness for practice initiative and other developments in health policy within the four countries of the UK, the book provides an invaluable support for students as they learn the skills in critical thinking that will enable the development of an accountable, professional practitioner. Both student- and patient-centred, the book is divided into five parts: Perspectives on nursing, Learning nursing, Practising nursing, Key aspects of care and Professional support and development. Key features: Completely revised and updated to reflect the new NMC Code Both student- and patient-centred Tackles key issues for today's student nurse, including health promotion, quality and the patient experience, informatics, diversity of care settings, accountable practice and ethics and the law Incorporates a wide range of helpful text features including learning objectives, section and chapter summaries, patient scenarios and reflective points, useful websites and further reading Reflects the governmental reports, policies, frameworks and targets of all four UK countries

At a time of great change, the moves towards a primary healthcare led NHS are challenging nurses to

Read Free Health Visiting Numeracy Papers

rethink their roles, organisation and strategy. This book combines an analysis of policies which have shaped community nursing from the 19th century with an exploration of trends and developments. Illustrated throughout with examples of responses to contemporary policies, this title should be useful for all community nurses, both practising and student, as well as for policy makers and sociologists.

Promotes verbal and written communication strategies that nurses can use to effectively meet the individualized needs of an increasingly diverse patient population in an effort to enhance patient-provider communication across the entire continuum of care.

The world of teacher research is rapidly changing following the introduction of Best Practice Research Scholarships. This was announced by the DfEE as part of a new Professional Development Plan in which teachers are to be allocated up to £3000 to do their own research (non-award bearing) with the support of an HE mentor. The TTA also believes that teachers should play a more active role in conceiving, implementing, evaluating and disseminating research. This book is for teachers who are looking, or being encouraged, to undertake research in their schools. Written by teachers and their HE research mentors, the book provides case studies which show teachers how to 'do' and 'use' research and how to 'do' effective pedagogy. Olwen MacNamara shows how a group of teachers set out to observe, describe, analyse and intervene in areas of primary education. The book can be raided for insights into research methods as well detailing professional issues about teaching and learning, and will be essential reading for teachers undertaking Best Practice Research Scholarships.
