In the fall of 1930, David Packard left his hometown of Pueblo, Colorado, to enroll at Stanford University, where he befriended another freshman, Bill Hewlett. After graduation, Hewlett and Packard decided to throw their lots in together. They tossed a coin to decide whose name should go first on the notice of incorporation, then cast about in search of products to sell. Today, the one-car garage in Palo Alto that housed their first workshop is a California historic landmark: the birthplace of Silicon Valley. And Hewlett-Packard has

produced thousands of innovative products for millions of customers throughout the world. Their little company employs 98,400 people and boasts constantly increasing sales that reached \$25 billion in 1994. While there are many successful companies, there is only one Hewlett-Packard, because from the very beginning, Hewlett and Packard had a way of doing things that was contrary to the prevailing management strategies. In defining the objectives for their company, Packard and Hewlett wanted more than profits, revenue growth and a constant stream of new, happy customers. Hewlett-Packard's success owes a great deal to many factors, including openness to change, an unrelenting will to win, the virtue of sustained hard work and a company-wide commitment to community involvement. As a result, HP now is universally acclaimed as the world's most admired technology company; its wildly successful approach to business has been immortalized as The HP Way. In this book, David Packard tells the simple yet extraordinary story of his life's work and of the truly exceptional company that he and Bill Hewlett started in a garage 55 years ago.

reaction to the problems generated by globalization supported and funded by some of the largest and most powerful corporations in their assault against social movements on the left to prevent the emergence of socialism against global capitalism. As the crisis of neoliberal global capitalism unfolds, and as we move to the brink of another economic crisis and the threat of war, global capitalism is once again resorting to authoritarianism and fascism to maintain its power. This book addresses this vital question in comparative-historical perspective and provides a series of case studies around the world that serve as a warning against the impending rise of fascism in the 21st century.

Aikido is the Way of Peace, a martial art aimed at harmonizing body and spirit with the natural forces of the universe. Developed in the late 1920s by martial artist and spiritual leader Morihei Ueshiba, Aikido is unique among martial arts for its emphasis on peace and philosophical and spiritual development. Though Aikido is a fighting system, its goal is not destruction and injury, but rather protection and harmony for all parties involved in the struggle. "Those who seek to compete and better one another are making a terrible mistake," says Morihei, "The real Way of a Warrior is to prevent such slaughter -- it is the Art of Peace, the power of love." In *Secrets of Aikido*, John

Approaching his middle forties, Gavin Boyter wondered what his life

was all about. A Scot living in London, single and with no kids, he was living for the job and the dwindling hope of a career in film. He had been a club runner all his life, pretty good but not at the front all that often. He was what he called an ordinary runner and he came to wonder just what an ordinary runner might be capable of. How about John O'Groats to Land's End, the longest linear run in Britain, and how about making a film of it? And how about writing a book? As usual, Gavin was neither the first nor the quickest but Downhill from Here is his real triumph, written in such an engaging and witty voice the reader accompanies him every step of the way.
