The relationship between environmental regulation and economic growth has gone from dysfunctional to disastrous under the leadership of Barack Obama's USEPA Administrator, Lisa Jackson. Jackson's EPA has assumed broad new powers and promulgated sweeping new regulations unlike anything that America has seen since the Clean Air Act and Clean Water Act were signed into law forty years ago. While much of the public has focused on the EPA's plans to regulate greenhouse gas emissions, the Agency's power grab extends into far more areas of society and the economy than fossil fuel use alone. Rich Trzupek explains why Obama's EPA is different and more dangerous, than any other since the Agency was created forty years ago. From the oceans to consumer products, from the manufacturing line to the showroom floor, the tentacles of this EPA are silently creeping into more and more parts of our lives as Lisa Jackson smilingly assures the nation that everything the EPA does generates revenue rather than costing industry billions of dollars and America hundreds of thousands of jobs.

With a focus on the basic imaging principles of breast MRI rather than on mathematical equations, this book takes a practical approach to imaging protocols, which helps radiologists increase their diagnostic effectiveness. This compelling novel follows four women as they learn to balance children, estranged husbands, boyfriends, and problems at work through their faith in God. Michelle, Tonya, Mrs. Judson, and Miz Ida. African-American, white, rich, poor -- they seemingly have nothing in common. Yet every day they face the complex realities of twenty-first-century urban life as they try to balance their needs with their belief in God. Through the course of a year, these women must come to terms with the past, discover their true identities, and recognize the unexpected miracles that reveal God's all-encompassing love. These four women entertain us and invite us to join in their lives. As they welcome us, they also introduce us to the men in their lives. The men play supporting roles, adding color and zest to the lives of the Cover Girls. Bishop Jakes knows the struggles real women encounter and the losses that make it difficult to face the future. He brings compassionate insight and deep wisdom to this novel and proves that he is not only a gifted preacher, but a born storyteller.
