teaching activities, which allow pupils to apply and develop their ICT capability in meaningful curriculum contexts.

This text is designed to lead the student through the process of studying, writing and achieving at masters level. It aims to demystify the process by tackling those issues students find difficult, explaining the conventions which must be followed in order to succeed at this level.

Are you keen to study at Master's level? Do you need to understand what is expected from your research and written work? Would you like to see real examples of successful Master's level study? If you answered 'yes' to any of these questions, then this is the book for you. Taking a practical approach, this book will guide you through and demystify the process of thinking, researching, writing and achieving at Master's level. It offers an insight into the knowledge, tools and skills that need to be developed for a successful outcome in an educational context. Using detailed - and real - exemplars, the authors cover the conventions that need to be followed and consider the different elements of Master's level work. Each chapter is supported by appropriate reference to, and extracts from, the three most common types of work undertaken - traditional essay, curriculum package, and portfolio. Now that the DCFS plans to make teaching a Master's level profession, it is vital that you can develop the confidence in making the transition from H level to M level. The book will enable you to:

- Understand how to prepare, carry out and write a literature review
- Consider the different methodologies and approaches that are inherent in Master's level work
- Understand the nature of Master's level work within education as a research/evidence based profession
- Appreciate

the importance of ethical underpinning when working at this level Master's Level Study in Education is a valuable guide not just for teacher training students but also for their mentors and for teachers in post, undertaking further Professional Development.

This title in the Success Guides series covers maths at AS level. Covering every topic on a colourful and highly illustrated double-page spread, Success Guides use unique design and presentation to make revision simple and effective. Key points are clearly highlighted throughout and examiners' tips emphasize common mistakes or areas of importance. At the end of every topic a quick test recaps the main areas to ensure that students have understood the points covered.

Revise KS3 Geography gives complete study support throughout all three years of Key Stage 3. This Study Guide matches the curriculum content and provides in-depth course coverage plus invaluable advice on how to get the best results in level assessments and tests.

'[This book] certainly isn't one of the dry educational tomes that often bedeck the shelves of the staffroom; it is an informative, accessible text which evolves into an enjoyable read. There aren't too many practitioner manuals that can boast that particular combination. A useful guide for the ICT leader seeking a practical/effective annual structure for their ICT leadership role' - Teach Primary Magazine This practical manual is the second part of a 2-volume set that

together makes up a detailed 2-year training programme for primary ICT and E-learning coordinators. The second book takes coordinators through the second year of the programme but may also be used as a starting point by more experienced staff. The structured training programme, timed over three terms, includes:

- o a complete review of E-Safety procedures in the light of the Every Child Matters agenda
- o Developing a funding model in order to plan for ICT developments, together with a broader ICT action planning review to embed a revised E learning vision through a series of long-term sustainable actions
- o Reviewing the curriculum in order to examine how the E Learning community will adapt its core practices to facilitate new technology
- o the evolving role of school websites as they assume interactivity and examine the place of E Learning within the extended schools agenda
- o Reviewing the use of ICT as a tool for management systems and discussing how ICT can be used to support different groups of children
- o examining self-evaluation strategies linked to the school's SEF, the Ofsted Section 5 Framework and Every Child Matters.

The books have a companion website, which will offer downloadable versions of the photocopiable sheets from the book, as well as links to other sources of help and advice.

This revision guide for Key Stage 3 Mathematics contains in-depth course coverage and advice on how to get the best results in the Year 9 National Test. It has progress check questions and exam practice questions.
