National sovereignty entails exclusive ownership of territories and natural resources, which often leads to uncompromising domination and subjugation of life by a central political authority. In a stark contrast, the Kurdish vision of political community invokes communal sovereignty, which is detached from the nation and the territorial state.

Kurds are the largest stateless people in the world. An estimated thirty-two million Kurds live in "Kurdistan," which includes parts of Turkey, Iraq, Syria, and Iran today's "hot spots" in the Middle East. The Kurdish Spring explores the subjugation of Kurds by Arab, Ottoman, and Persian powers for almost a century, and explains why Kurds are now evolving from a victimized people to a coherent political community. David L. Phillips describes Kurdish

rebellions and arbitrary divisions in the last century, chronicling the nadir of Kurdish experience in the 1980s. He discusses draconian measures implemented by Iraq, including use of chemical weapons, Turkey's restrictions on political and cultural rights, denial of citizenship and punishment for expressing Kurdish identity in Syria, and repressive rule in Iran. Phillips forecasts the collapse and fragmentation of Iraq. He argues that US strategic and security interests are advanced through cooperation with Kurds, as a bulwark against ISIS and Islamic extremism. This work will encourage the public to look critically at the post-colonial period, recognizing the injustice and impracticality of states that were created by Great Powers, and offering a new perspective on sovereignty and statehood.

Ashlyn Woods can't wait to put her past behind her and start her life over as a normal college student. But her plans take an unexpected turn when she discovers that she is a Soterian: a person who develops amazing powers when the balance of good and evil shifts too far in evil's favor. Soon she and the other Soterians are learning to use their powers to prevent California from being plunged into chaos. But they quickly discover that they're up against a much more dangerous enemy than they anticipated. And when Ashlyn meets Kai, a devastatingly gorgeous guitar player, she realizes she must sacrifice more than she ever imagined.

In spite of the promises made by the Allied powers in the 1920 Treaty of Sèvres, the Kurds have so far failed to secure their national independence - a goal achieved by the Arabs and other

nations in the region. The author shows how, before and during the First World War, the political manoeuvring of the Allied powers, particularly Britain, concentrated on securing easy access to the region's oilfields and thus ignored the rights of the Kurds. The role and involvement of Germany and Russia are also discussed in detail. Of major importance are the chapters examining the role of the Kurds in the Armenian massacres. In his dispassionate analysis of this sensitive issue, the author sheds new lights on the involvement of the Kurds in the tragedy of the Armenian people under Ottoman rule.

After learning of atomic physics, H. G. Wells began to think of its potential impact on human society. In *The World Set Free*, atomic energy causes massive unemployment, shaking the already fragile

social order. The ambitious powers of the world decide to seize the opportunity to compete for dominance, and a world war breaks out, echoing the looming Great War about to ignite in 1914. Waking to the catastrophe, humanity begins the hard search for a way into a better future. The novel traces a soldier, an ex-king, a despot, and a sage through a profound transformation of human society, and we gain a window into Wells' own thoughts and hopes along the way. With one prophetic stroke, Wells gives the first detailed depiction of atomic energy and its potential destructive power, and predicts the use of the air power in modern warfare. He may have even directly influenced the development of nuclear weapons, as the physicist Leó Szilárd, shortly after reading the novel in 1932, then conceived of harnessing the neutron chain reaction critical to the development of the atom bomb. A story about romance and everyday life that takes place in the Chicagoland area.

In this story, shadows are depicted as parental figures. Parentals provide coverings and are essential to us discovering our identity. Authors Jelina Sheppard and Karter Sheppard tell a story of a little boy born without his covering. Join the boy with no shadow as he discovers how amazing and unique he is, with or without his shadow. We don't always have what we want, but the sun will always provide us with what we need when we need it most. Until then, "Just remember, you're still awesome times three..." Jelina Sheppard is the mother of four-year-old Karter and needed a
