Where do you run when there's nowhere to hide? When a sadistic serial killer known as the Headhunter resurfaces, a government blunder forces the Elite Operatives Organization into action. Operation Mask falls to Lynx. She has the determination, skills, and most importantly, the right profile, but her youth and lack of experience in the field could put more than the mission in jeopardy. Her search takes her deep into the jungles of Asia, where she must battle not only the ruthless purveyors of the international skin trade, but also her growing feelings for a mysterious mercenary with her own agenda for the Headhunter.

Before the Internet became widely known as a global tool for terrorists, one perceptive U.S. citizen recognized its ominous potential. Armed with clear evidence of computer espionage, he began a highly personal quest to expose a hidden network of spies that threatened national security. But would the authorities back him up? Cliff Stoll's dramatic firsthand account is "a computer-age detective story, instantly fascinating [and] astonishingly gripping" (Smithsonian). Cliff Stoll was an astronomer turned systems manager at Lawrence Berkeley Lab when a 75-cent accounting error alerted him to the presence of an unauthorized user on his system. The hacker's code name was "Hunter"—a mysterious invader who managed to break into U.S. computer systems and steal sensitive military and security information. Stoll began a one-man hunt of his own: spying on the spy. It was a dangerous game of deception, broken codes, satellites, and missile bases—a one-man sting operation that finally gained the attention of the CIA. . . . and ultimately trapped an international spy ring fueled by cash, cocaine, and the KGB.
