The fifth edition of Romer's Advanced Macroeconomics continues its tradition as the standard text and the starting point for graduate macroeconomics courses and helps lay the groundwork for students to begin doing research in macroeconomics and monetary economics. Romer presents the major theories concerning the central questions of macroeconomics. The theoretical analysis is supplemented by examples of relevant empirical work, illustrating the ways that theories can be applied and tested. In areas ranging from economic growth and short-run fluctuations to the natural rate of unemployment and monetary policy, formal models are used to present and analyze key ideas and issues. The book has been extensively revised to incorporate important new topics and new research, eliminate inessential material, and further improve the presentation.

These events are sufficiently important to be incorporated into the body of the text rather than just added as boxed-off features. In particular, they stress the lesson policymakers recently learned the hard way: What happens in the ever-expanding part of the financial system that does not involve commercial banks is of vital importance to the entire economy. This exciting text presents students with the underlying economic explanations of why the financial system is organized as it is and how the financial system is connected to the broader economy. Due to the overwhelming success of their principles of economics textbook, Hubbard and O'Brien have employed a similar approach in this textbook: They provide students with a framework that allows them to apply the theory that they learn in the classroom to the practice of the real world. 0133148688 / 9780133148688 Money, Banking, and the Financial System Plus NEW MyEconLab with Pearson eText -- Access Card Package Package consists of: 0132994917 / 9780132994910 Money, Banking, and the Financial System 0133020002 / 9780133020007 NEW MyEconLab with Pearson eText -- Access Card -- for Money, Banking, and the Financial System

This edition highlights current issues and emerging trends in the field of educational psychology. The tenth edition continues to have in-depth, practical coverage with a focus on the intentional teacher by presenting up-to-the-minute research that a reflective, intentional teacher can apply. An "intentional teacher," according to Slavin, is one who constantly reflects on his or her practice and makes instructional decisions based on a clear conception of how these practices affect students. To help readers become "intentional teachers," the author offers a set of questions to guide them and models best practices through classroom examples.

Remediation in medical education is the act of facilitating a correction for trainees who started out on the journey toward becoming excellent physicians but have moved off course. This book offers an evidence-based and practical approach to the identification and remediation of medical trainees who are unable to perform to standards. As assessment of clinical competence and professionalism has become more sophisticated and ubiquitous, medical educators increasingly face the challenge of implementing effective and respectful means to work with trainees who do not yet meet expectations of the profession and society. Remediation in Medical Education: A Mid-Course Correction describes practical stepwise approaches to remediate struggling learners in fundamental medical competencies; discusses methods used to define competencies and the science underlying the fundamental shift in the delivery and assessment of medical education; explores themes that provide context for remediation, including professional identity formation and moral reasoning, verbal and nonverbal learning disabilities, attention deficit disorders in high-functioning individuals, diversity, and educational and psychiatric topics; and reviews system issues involved in remediation, including policy and leadership challenges and faculty development.
