Containing 26 selected and thoroughly rewritten essays and articles (all written by Janssen and published previously between 1976 and 2002 in yearbooks and periodicals) all dedicated to the history of printing and book production, this work draws systematically attention to the typographical design of the book. The articles are mainly divided into two fields of attention: the analytical bibliography of the printed book (book production, studies of the technical aspects of type-setting and printing, type founding, printing presses, paper etc.) and the typographical design of books (its functions and its influence on how texts are read). With illustrations. Cover design, typography, and lay-out by Bram de Does.
