This book covers Goat production in the Tropics.

Traditional building economics has primarily been concerned with issues around project appraisal and cost management techniques. On the other hand, modern construction economics has a wider focus with stronger links to mainstream economics, reflecting an increased interest in a range of theoretical issues in construction economics, both at the macro and micro level. In Modern Construction Economics: Theory and Application, a variety of approaches are used to present a coherent vision of synthesis between industry economics and project economics. Topics covered include: developing construction economics as industry economics competition and barriers to entry in construction innovation in construction theory testing in construction management research collusion and corruption in the construction sector. Including contributions from academics in the UK, Sweden, Hong Kong, and Australia, this is a truly global review of a core issue for the construction industry worldwide. The result is a unique book that will push toward the development of a comprehensive theoretical framework of construction economics. This is a must-read for all serious students of construction economics, and all practitioners looking for a deeper understanding of their industry.

"Published under the auspices of the Ludwig von Mises Institute." Includes bibliographical references (p. [225]-243) and index.

Who was Jaipal Singh Munda? What was his political-intellectual contribution in Indian Independence and in building of a new India? What were the aspirations of the tribal society that Jaipal and other Tribal leaders were representing? Even after seventy years of Independence, history is silent on this. On one hand, there are hundreds of books, dramas and movies on many freedom fighters including Gandhi, Nehru, Jinnah, Ambedkar, and still many more new books are coming on them every day, but there is not a single book on Jaipal Singh Munda. It was the native people, who had built this country by giving the great civilization of Harappa-Mohanjodaro to the humankind. Was their representative Jaipal Singh Munda so insignificant that not a single book could have been written on him? If, he was the real heir of the first freedom-loving community in the colonial India, who had always been at the top of all spheres of knowledge, creation and conflict. And if, he had been a worthy leader of distinguished talent, then what're the reasons for which he has been neglected to that extent? Although, he had been neglected at the pan-Indian level, the ruling class could not erase Jaipal Singh Munda from Adivasi society, its history and the politics of Jharkhand. It is because of continuous storm surging in the form of Jharkhand movement never let erased the contribution and leadership of Jaipal Singh Munda from its conscience of historical conflict.

This book provides a study of the forces underlying the development of economic thought at Cambridge University during the late nineteenth century and the first half of the twentieth century. The primary lens it uses to do so is an examination of how Arthur Cecil Pigou's thinking, heavily influenced by his predecessor, Alfred Marshall, evolved. Aspects of Pigou's context, biography and philosophical grounding are reconstructed and then situated within the framework of Ludwik Fleck's philosophy of scientific knowledge, most notably by drawing on the notions of 'thought styles' and 'thought collectives'. In this way, Knight provides a novel contribution to the history of Pigou's economic thought.
