Relics and Writing in Late Medieval England uncovers a wide-ranging medieval discourse that had an expansive influence on English

literary traditions. Drawing from Latin and vernacular hagiography, miracle stories, relic lists, and architectural history, this study demonstrates that, as the shrines of England's major saints underwent dramatic changes from c. 1100 to c. 1538, relic discourse became important not only in constructing the meaning of objects that were often hidden, but also for canonical authors like Chaucer and Malory in exploring the function of metaphor and of dissembling language. Robyn Malo argues that relic discourse was employed in order to critique mainstream religious practice, explore the

consequences of rhetorical dissimulation, and consider the effect on the socially disadvantaged of lavish expenditure on shrines. The work thus uses the literary study of relics to address issues of clerical and lay cultures, orthodoxy and heterodoxy, and writing and reform.

This volume brings together innovative research on miracles in the Christian West 1100-1500, and includes chapters on Anglo-Norman saints' cults, late medieval Portugal and the legacy of medieval hagiography in the immediate Post-Reformation period.

Contributors investigate miracle narratives in conjunction with broader socio-cultural ideals, practices and developments in medieval society. They also reassess the legacy of Peter Brown, challenge established dichotomies such as 'medicine and religion', and examine relics, lay beliefs and the liturgical evidence of a saint's cult, moving beyond the traditional focus on canonization. Medical history features prominently alongside other approaches; these clarify the contexts of our sources, and demonstrate the methodological vibrancy in this field.

Peasants of remote history rarely speak to us in their own voices, but Thomas Bisson's engagement with the records of several hundred twelfth-century rural Catalonians enables us to hear these voices. Bisson describes these peasants socially and culturally, showing how their experience figured in a wider crisis of power during the twelfth century.

Medievalists have long taught that highly emotional Christian devotion, often called 'affective piety', appeared in Europe after the twelfth century and was primarily

practiced by communities of mendicants, lay people and women. Emotional monasticism challenges this view. The first study of affective piety in an eleventh-century monastic context, it traces the early history of affective devotion through the life and works of the earliest known writer of emotional prayers, John of Fécamp, abbot of the Norman monastery of Fécamp from 1028–78. Exposing the early medieval monastic roots of later medieval affective piety, the book casts a new light on the devotional life of monks in Europe before the twelfth century and redefines how medievalists should teach

the history of Christianity.

This is a well written and valuable study of the life of a familiar but still somehow shadowy figure and an important contribution to medieval intellectual history, with insights into the meaning of the twelfth-century renaissance, the monastic mindset, the invention of psychological thought, the birth of the university, and the historiography of the Crusades.
