~~General Surgery. The Osler Institute has over thirty years of experience in preparing physicians for their board examinations. We can help you today. A survey of Osler participants shows significantly higher pass rates for Osler students compared with those who did not take our course. The difference in pass rates is difficult to explain away by self-selection in attendance over-representing those who would have passed without taking the Osler course.~~

Clinical Scenarios in Surgery: Decision Making and Operative Technique presents 125 cases in all areas of general surgery: GI, breast, hepatobiliary, colorectal, cardiothoracic, endocrine, vascular, trauma, pediatric, critical care, and transplant. Each full-color case begins with a patient presentation and proceeds through differential diagnosis, diagnosis and treatment, surgical procedures, postoperative management, and a case conclusion. Each case includes key technical steps, potential pitfalls, take-home points, and suggested readings. The patient stories in these clinical scenarios provide context to facilitate learning the principles of safe surgical care. This book will be particularly useful for senior surgical residents and recent graduates as they prepare for the American Board of Surgery oral examination.

Packed with 65 sample cases covering all core topics, Ophthalmology Oral Board Review is an image-based case review designed to help you prepare—and succeed—on the American Board of Ophthalmology oral board certification exam. Regardless of your level of experience, the book features simple tools, advice, and tactics to become more organized, assertive, and confident in delivering case presentations.

This book presents a realistic approach to preparing for the exam. Provides tips on identifying the wrong answers. Dr. Neff provides one proven successful strategy to preparing for the entire exam; competition offers a variety of approaches, giving little credibility to any single one.

ENT Board Prep is a high-yield review that is an ideal study guide for the ENT in-service and board exams. While other review guides are low yield or more of a textbook, this is quick, concise, and easy-to-use, providing everything you need to know in a easy to digest format. ENT Board Prep offers review on sections such as cancer, ear, sinus, plastics, sleep, and laryngology, as well as case studies useful for studying for the oral board exams. Written and edited by leaders in the field, this book aims to serve future residents and fellows in those crucial weeks leading up to the ENT board exam.

Now greatly expanded to include all common open surgical and endovascular interventions for both arterial and venous diseases, Clinical Scenarios in Vascular Surgery, 2nd Edition, is ideal both for general surgery residents and surgeons in practice. You'll explore 124 case scenarios, each presented in an easy-to-digest format, designed to be read in one sitting. After each case, there are two multiple choice questions that allow for a self-assessment of the case material. With nearly twice the number of chapters as the first edition, this updated text reflects the tremendous advancements that have been made in the diagnosis

and treatment of vascular disease, including the new terminology, tests, and procedures that every contemporary surgeon needs to know.

From cover to cover, Fast Facts for the Family Medicine Board Review is designed to help you achieve success on the American Board of Family Medicine exam. This easy-to-use, up-to-date review tool is aligned with the ABFM exam, providing essential information to help you succeed. In every chapter, succinct clinical knowledge is structured to allow immediate practice for testing that knowledge—a proven format for success on medical board exams and in practice.

Facing the American Board of Surgery Certifying Exam is not merely taking another exam. Most surgeons are not exposed to the techniques of oral examinations or to the best methods to prepare for them. It is seemingly a game in which you have to ascertain the rules, but in reality it is no game. The stakes are high. Reading from sizeable textbooks, poorly-organized review books, and one-dimensional autobiographic example scenarios undeniably makes studying for this exam more stressful than fruitful. Knowing what is important and what is not is crucial when studying for this particular exam. The authors have learned how the challenges can be overcome; as a result, this book was written to include everything that you will need to successfully pass this critical exam. This guide provides pertinent pearls of wisdom quoted from others who have successfully taken the exam and includes:

- One hundred and forty-five subjects of content,
- Twenty-six bulleted descriptions of the most commonly probed surgical procedures, and,
- Sixty-nine of the most commonly asked subjects over the last ten years stressed with invaluable example scenarios that show how content and technique should be employed synergistically.

This review book contains 1,200 multiple-choice questions modeled on the types of questions seen in Part 1 of the board certification exam in adult psychiatry. The questions are accompanied by answers and explanations for why one answer is correct and the others are incorrect. Questions are divided into 17 specialty categories—basic psychopathology, schizophrenia, mood disorders, anxiety disorders, geriatric psychiatry, child psychiatry, consultation-liaison psychiatry, forensic psychiatry, substance misuse, eating disorders and sexual disorders, mental retardation, sleep disorders, personality disorders, psychopharmacology, psychotherapies, psychology, and neurology. An additional chapter covers miscellaneous topics. All information has been thoroughly reviewed by experienced psychiatrists.

Focusing on the topics commonly found on ABFM in-training, board certification, and recertification examinations, The Family Medicine Board Review Book helps you make the most of your study time and achieve exam success. It provides valuable background information on all three AFBM exams and their formats, presents more than 1,800 multiple choice questions for self-assessment, and helps you identify areas that may require further study. Ideal for residents, practicing physicians, and nurse practitioners, this new review tool is an excellent resource for testing your knowledge of the entire field of family medicine.
