Consumer health websites have garnered considerable media attention, but only begin to scratch the surface of the more pervasive transformations the Internet could bring to health and health care. Networking Health examines ways in which the Internet may become a routine part of health care delivery and payment, public health, health education, and biomedical research. Building upon a series of site visits, this book: Weighs the role of the Internet versus private networks in uses ranging from the transfer of medical images to providing video-based medical consultations at a distance. Reviews technical challenges in the areas of quality of service, security, reliability, and access, and looks at the potential utility of the next generation of online technologies. Discusses ways health care organizations can use the Internet to support their strategic interests and explores barriers to a broader deployment of the Internet. Recommends steps that private and public sector entities can take to enhance the capabilities of the Internet for health purposes and to prepare health care organizations to adopt new Internet-based applications.

The text and images in this book are in grayscale. A hardback color version is available. Search for ISBN 9781680922929. Principles of Accounting is designed to meet the scope and sequence requirements of a two-semester accounting course that covers the fundamentals of financial and managerial accounting. This book is specifically designed to appeal to both accounting and non-accounting majors, exposing students to the core concepts of accounting in familiar ways to build a strong foundation that can be applied across business fields. Each chapter opens with a relatable real-life scenario for today's college student. Thoughtfully designed examples are presented throughout each chapter, allowing students to build on emerging accounting knowledge. Concepts are further reinforced through applicable connections to more detailed business processes. Students are immersed in the "why" as well as the "how" aspects of accounting in order to reinforce concepts and promote comprehension over rote memorization.

From the Fab Five--the beloved hosts of Netflix's viral hit Queer Eye--comes a book that is at once a behind-the-scenes exclusive, a practical guide to living and celebrating your best life, and a symbol of hope. Feeling your best is about far more than deciding what color to paint your accent wall or how to apply nightly moisturizer. It's also about creating a life that's well-rounded, filled with humor and understanding--and most importantly, that suits you. At a cultural moment when we are all craving people to admire, Queer Eye offers hope and acceptance. After you get to know the Fab Five, together they will guide you through five practical chapters that go beyond their designated areas of expertise (food & wine, fashion, grooming, home decor, and culture), touching on topics like wellness, entertaining, and defining your personal brand, and complete with bite-sized Hip Tips for your everyday quandaries. Above all else, Queer Eye aims to help you create a happy and healthy life, rooted in self-love and authenticity.

This Environmental Health Criteria (EHC) series publication addresses dermal exposure to chemicals. It describes sources and pathways of dermal exposure, models and tools to estimate dermal exposure and methods for dermal exposure prevention and reduction. Furthermore, the EHC introduces skin diseases associated with dermal exposure. This EHC aims to provide information to national regulatory authorities to assist in conducting health risk assessments and managing the risk involving dermal exposure to chemicals.

Research in Interactive Design presents an in-depth study of new product design methods. Interactive design is an original structured design approach that has recently emerged from transversal research. On the research side, the topic of interactive design is the fruitful result of sophisticated joint studies combining specific numerical engineering theories, original development in design science and industrial engineering, new discoveries in mechatronics and advanced mechanical engineering methods. Additionally, industry benefits from interactive design instruments. Interactive design is a constructive approach that tends to ensure innovation by improving user-integration in the design process, fostering the development of virtual prototypes and providing new powerful ways for collaborative design activities. Interactive design instruments are seen as the extension of traditional CAD tools. This book provides an accurate overview of the recent research of industrial application in interactive design. The different arguments, taken from the international conference Virtual Concept 2005, will provide the reader with some advanced solutions concerning new methods and tools by discussing: - modelling techniques: new techniques ensuring the development of high qualified, updated and reduced models being able to represent the behaviour of a process or a product in its environment; - design solution space exploration: specific instruments dedicated to the identification of suitable design solutions and their virtual representation allowing engineers to have interaction with the virtual worlds; - interactive process organization: studies highlighting the basic evolutions of a process integrating new instruments of interactive design. Each subsequent part of the book addresses both advanced techniques and industrial applications of the latest successful research in interactive design. The solutions presented are enhanced by demonstrations of real industrial problem-solving. The different chapters strongly highlight novel solutions for supporting decision-making in a huge field of engineering: product design, manufacturing and assembly, training and risk prevention, Robotics, design for customers, mechanical engineering, etc. In this book, whether a researcher or an industrialist, the reader will find the most recent interactive design techniques and is sure to extract some significant concepts.
