A particularly long and/or deep recession. While there is no technical definition of a depression, conventionally it is defined as a period featuring severe declines in productivity and investment and particularly high unemployment. During the Great Depression, for example, GDP in the United States dropped 12% between 1929 and 1930 and a further 16% the following year.

Covering the essentials of fund accounting, this text introduces the reader to the basic accounting principles at work in both US governmental and not-for-profit organizations. Readers should find this an easy to read book written in a simple, understandable language with many exhibits, illustrative problems and appropriate financial statements.

For more than 60 years, Accounting for Governmental & Nonprofit Entities has been the leader in the market. It is a comprehensive governmental and not-for-profit accounting text written for students who will be auditing and working in public and notfor- profit sector entities. Originally published in 1951 and written by Professor R. M. Mikesell, this book—and the many subsequent editions revised by Professors Leon Hay, Earl Wilson, Susan Kattelus, Jacqueline Reck, and Suzanne Lowensohn—have given generations of instructors and students a comprehensive knowledge of the specialized accounting and financial reporting practices of governmental and not-for-profit organizations, as well as an understanding of how those organizations can better meet the information needs of a diverse set of financial statement users and decision makers. The vision of these original authors continues to be reflected in this 17th edition, and their strategy of providing a large and innovative set of instructional support materials prepared and tested in the classroom by the authors continues to be a guiding principle today. The current author team brings to this edition their extensive experience teaching government and not-for-profit courses as well as insights gained from their professional experience, scholarly writing, and professional activities. The result is a relevant and accurate text that includes the most effective instructional tools.

This text is intended for a first course in introductory financial accounting. It was updated to reflect current International Financial Reporting Standards (IFRS). For example, it reflects the recent change in IAS38, para. 98, allowing the use of multiple methods in amortizing intangible assets. It focuses on core Introductory Financial Accounting topics that match pre-requisite requirements for students advancing to Intermediate Financial Accounting. Excluded are advanced topics that are covered in Intermediate Financial Accounting, such as leases and bond amortization. The text takes a corporate approach (vs. beginning with a sole proprietorship emphasis and then converting to a corporate approach); this consistency throughout the book reduces confusion for the introductory student. The book covers all essential topics: the accounting cycle, merchandising, assigning costs to inventory, cash and receivables, property, plant and equipment, debt financing, equity financing, statement of cash flows, financial statement analysis, and proprietorships and partnerships. Additionally, this version of the open text is supported by Lyryx Learning, offering at an affordable price editorial services to develop and adapt the content, formative online assessment, course supplements, and daily support to both the students and instructors.
