The Entropy, Order Parameters, and Complexity f26 Random Walks and Emergent Properties net energy from this reaction depends on details, but varies between about 2 and 5 times  $10^{-20}$  Joule. This is actually a Gibbs free energy difference, but for this exercise treat it as just an energy difference.

The book Statistical Mechanics: Entropy, Order Parameters and Complexity by James Sethna is excellent. I have used it as the main textbook in my course on Statistical Physics for first year graduate students at the Universidade Estadual de Campinas (UNICAMP) in Brazil. The students and I liked it very much.
