In an attempt to instil trust in their performance, credibility, integrity, efficiency, cost-effectiveness, and good governance, many public organizations are in effect viewing tax-paying citizens as consumers. Little research exists to explore synergies between the market economy, public administration reformation, and their complex bilateral effects. This book takes a timely look at the heightened need for public administration reform as a result of the economic challenges currently faced by nations across the globe. In particular it explores the roles of eGovernment and a citizen-centric focus in this transformation. Public Administration Reform examines several commonly-held assumptions about public administration: the public sector is slow and bureaucratic; government employees are frequently disengaged; and government agencies are sometimes wasteful. eGovernment is proposed as a key tool in the improvement of both public services and reputations of public organizations.

Urban Schools: Crisis and Revolution describes America's inner-city public schools and the failure of most to provide even a minimally adequate education for their students. With numerous examples, James Deneen and Carm Catanese argue that these failures are

preventable. Early chapters document the two-tiered character of American public schools, the tragic consequences of failing schools for millions of students—mostly Black and Hispanic—and the financial costs to American society. In later chapters, Deneen and Catanese describe the special problems of inner-city schools and the changes in school organization and curriculum needed to overcome them. They also provide examples of schools in severely disadvantaged communities in which such changes have enabled students to succeed academically, graduate, and enter college. In the final chapters, the authors examine the public and non-public school options available to urban parents. They discuss school choice, a hotly debated issue in urban education. The book concludes with a plan, consisting of six recommendations, for reforming a failing urban school.

In *Opportunity and Hope*, prominent journalist Naomi Schaefer Riley chronicles the lives of 10 representative stories of how Children's Scholarship Fund alumni who—because of the educational opportunities afforded them—were able to turn less than perfect childhood circumstances into successful lives and careers. The stories of these children, now grown, and their families are nothing less than inspirational. They are proof that all any of America's children need to achieve their dreams is a chance, and someone to believe in them. They are also a testament to the power of private schools, including many inner-city faith-based schools, and they are proof that given the chance for the right kind of education, anyone can achieve the American dream no matter what or where they come from.

State education departments and school districts face an important challenge in implementing a new law that requires disadvantaged students to be held to the same standards as other students. The new requirements come from provisions of the 1994 reauthorization of Title I, the largest federal effort in precollegiate education, which provides aid to "level the field" for disadvantaged students. *Testing, Teaching, and Learning* is written to help states and school districts comply with the new law, offering guidance for designing and implementing assessment and accountability systems. This book examines standards-based education reform and reviews the research on student assessment, focusing on the needs of disadvantaged students covered by Title I. With examples of states and districts that have track records in new systems, the committee develops a practical "decision framework" for education officials. The book explores how best to design assessment and accountability systems that support high levels of student learning and to work toward continuous improvement. *Testing, Teaching, and Learning* will be an important tool for all involved in educating disadvantaged students—state and local administrators and classroom teachers.

States experiencing taxpayer revolts among homeowners are tempted to reduce reliance on the property tax to fund schools. But a more targeted approach can provide property tax relief and improve state funding for public education. This policy focus report includes a comprehensive review of recent research on both property tax and school funding, and summarizes case studies of seven states-- California, Massachusetts, Michigan, New Hampshire, New Jersey, Ohio and Texas. The majority of these states are heavily reliant on property tax revenues to fund schools. While there is no one-size-fits-all solution, the report recommends addressing property taxes and school funding separately.

The prize-winning PBS correspondent's provocative antidote to America's misguided approaches to K-12 school reform During an

illustrious four-decade career at NPR and PBS, John Merrow—winner of the George Polk Award, the Peabody Award, and the McGraw Prize—reported from every state in the union, as well as from dozens of countries, on everything from the rise of district-wide cheating scandals and the corporate greed driving an ADD epidemic to teacher-training controversies and America ’ s obsession with standardized testing. Along the way, he taught in a high school, at a historically black college, and at a federal penitentiary. Now, the revered education correspondent of PBS NewsHour distills his best thinking on education into a twelve-step approach to fixing a K–12 system that Merrow describes as being “ addicted to reform ” but unwilling to address the real issue: American public schools are ill-equipped to prepare young people for the challenges of the twenty-first century. This insightful book looks at how to turn digital natives into digital citizens and why it should be harder to become a teacher but easier to be one. Merrow offers smart, essential chapters—including “ Measure What Matters, ” and “ Embrace Teachers ” —that reflect his countless hours spent covering classrooms as well as corridors of power. His signature candid style of reportage comes to life as he shares lively anecdotes, schoolyard tales, and memories that are at once instructive and endearing. Addicted to Reform is written with the kind of passionate concern that could come only from a lifetime devoted to the people and places that constitute the foundation of our nation. It is a “ big book ” that forms an astute and urgent blueprint for providing a quality education to every American child.

Economics can be a lens for understanding the behavior of schools, districts, states, and nations in meeting education needs of their populaces, as well as for understanding the individual decisions made by administrators, teachers, and students. Insights from economics help decision makers at the state level understand how to raise and distribute funds for public schools in an equitable manner for both schools and taxpayers. Economics also can assist researchers in analyzing effects of school spending and teacher compensation on student outcomes. And economics can provide important insights into public debates on issues such as whether to offer vouchers for subsidizing student attendance at private schools. This two-volume encyclopedia contains over 300 entries by experts in the field that cover these issues and more. Features: This work of 2 volumes (in both print and electronic formats) contains 300-350 signed entries by significant figures in the field. Entries conclude with cross-references and suggestions for further readings to guide students to in-depth resources. Although organized in A-to-Z fashion, a thematic “ Reader ’ s Guide ” in the front matter groups related entries by topic. Also in the front matter, a chronology provides students with historical perspective on the development of education economics and finance as a field of study The entire work concludes with a Resources appendix and a comprehensive Index. In the electronic version, the index, Reader's Guide, and cross references combine to provide effective search-and-browse capabilities.
