insights from research and theory on the numerous ways in which L2 speaking and writing support and enhance each other.

Contributors to this collection not only report on recent research and theoretical developments but also on state-of-the-art pedagogical practices linking oral skills and literacy. Although research and theory are informed by practice throughout the text's four parts, the thematic organization proceeds from more theoretical and research-oriented issues to more classroom-based perspectives: § Theory and research on the interaction between speaking and writing § How speaking scaffolds writing § How writing scaffolds speaking § How technology bridges speaking and writing This volume offers readers both a compelling rationale for connecting speaking and writing in the L2 classroom and an informed means of making these connections. A wide array of theoretical and classroom-oriented

topics is offered, ranging from sociocultural and second-language acquisition theory to classroom concordancing and blogging. The book has a foreword by John M. Swales and an Afterword by Paul Kei Matsuda.

This series for teachers and teacher trainers gives sound, straightforward advice on good teaching methods, and practical suggestions for lessons and activities. This text focuses on organizing a balanced program of interaction activities for accuracy and fluency work in the classroom.

English has an interesting variety of noun phrases, which differ greatly in structure. Examples are 'binominal' (two-noun) phrases ('a beast of a party'); possessive constructions ('the author's opinion');

and discontinuous noun phrases ('the review [came out yesterday] of his book'). How are these different noun phrases structured? How do we produce and understand them? These questions are central to this study, which explores the interaction between the form of noun phrases, their meaning, and their use. It shows how, despite the need in linguistic analysis for strict categories, many linguistic constructions in fact defy straightforward classification - and concludes that in order to fully explain the internal structure of utterances, we must first consider the communicative, pragmatic and cognitive factors that come into play. Drawing on a range of authentic examples, this book sheds light not only on the noun phrase itself but also the nature of linguistic classification.
