["The book you are holding will fundamentally change the way you look at the collection, compartmentalization, analysis, distribution, application, and protection of intelligence in your business. J. C. Carleson's presentation of years of spy tradecraft will make you a more effective force within your organization."](#) [James Childers, CEO, ASG Global, Inc.](#) When J. C. Carleson left the corporate world to join the CIA, she expected an adventure, and she found it. Her assignments included work in Iraq as part of a weapons of mass destruction search team, travels throughout Afghanistan, and clandestine encounters with foreign agents around the globe. What she didn't expect was that the

skills she acquired from the CIA would be directly applicable to the private sector. It turns out that corporate America can learn a lot from spies—not only how to respond to crises but also how to achieve operational excellence. Carleson found that the CIA gave her an increased understanding of human nature, new techniques for eliciting information, and improved awareness of potential security problems, adding up to a powerful edge in business. Using real examples from her experiences, Carleson explains how working like a spy can teach you the principles of: Targeting—figuring out who you need to know and how to get to them Elicitation—a subtle way to get the answers you need without even asking a question Counterintelligence—how to determine if your organization is unwittingly leaking information Screening—CIA recruiters' methods for finding and hiring the right people The methods developed by the CIA are all about getting what you want from other people. In a business context, these techniques apply to seeking a new job, a promotion, a big sale, an advantageous regulatory ruling, and countless other situations. As Carleson writes, "In a world where information has a price, it pays to be vigilant." Her book will show you how.

Demonstrates how techniques used by CIA officers can give business professionals a significant advantage in areas of operational excellence and during crises, drawing on real-world examples from the author's undercover work to share strategies for inspiring loyalty, recognizing achievement and defending against corporate espionage.

INSTANT NEW YORK TIMES BESTSELLER "Fast and thrilling . . . Life Undercover reads as if a John le Carré character landed in Eat Pray Love." "The New York Times Amaryllis Fox's riveting memoir tells the story of her ten years in the most elite clandestine ops unit of the CIA, hunting the world's most dangerous terrorists in sixteen countries while marrying and giving birth to a daughter Amaryllis Fox was in her last year as an undergraduate at Oxford studying theology and international law when her writing mentor Daniel Pearl was captured and beheaded. Galvanized by this brutality, Fox applied to a master's program in conflict and terrorism at Georgetown's School of Foreign Service, where she created an algorithm that predicted, with uncanny certainty, the likelihood of a terrorist cell arising in any village around the world. At twenty-one, she was recruited by the CIA. Her first assignment was reading and analyzing hundreds of classified cables a day from foreign governments and synthesizing them into daily briefs for the president. Her next assignment was at the Iraq desk in the Counterterrorism center. At twenty-two, she was fast-tracked into advanced operations training, sent from Langley to "the Farm," where she lived for six months in a simulated world learning how to use a Glock, how to get out of flexicuffs while locked in the trunk of a car, how to withstand torture, and the best ways to commit suicide in case of captivity. At the end of this training she was deployed as a spy under non-official cover--the most difficult and coveted job in the field as an art dealer specializing in tribal and indigenous art and sent to infiltrate terrorist networks in remote areas of the Middle East and Asia. Life Undercover is exhilarating, intimate, fiercely intelligent--an impossible to put down record of an extraordinary life, and of Amaryllis Fox's astonishing courage and passion.

- * Master the "Weapons of Mass Influence" to recruit others, build rapport, and make allies when you need them most

Reveals the formidable organization of intelligence outsourcing that has developed between the U.S. government and private companies since 9/11, in a report that reveals how approximately seventy percent of the nation's funding for top-secret tasks is now being funneled to higher-cost third-party contractors. 35,000 first printing.

Three former CIA officers share their techniques for lie detection, outlining methods for identifying deceptiveness as revealed by verbal and non-verbal behaviors from facial expressions and grooming gestures to invoking religion and using qualifying language.

The author describes his early life, growing up in a dysfunctional family, and how he ended up becoming a CIA case officer.

In *See No Evil*, one of the CIA's top field officers of the past quarter century recounts his career running agents in the back alleys of the Middle East. In the process, Robert Baer paints a chilling picture of how terrorism works on the inside and provides compelling evidence about how Washington politics sabotaged the CIA's efforts to root out the world's deadliest terrorists. On the morning of September 11, 2001, the world witnessed the terrible result of that intelligence failure with the attack on the World Trade Center and the Pentagon. In the wake of those attacks, Americans were left wondering how such an obviously long-term, globally coordinated plot could have escaped detection by the CIA and taken the nation by surprise. Robert Baer was not surprised. A twenty-one-year veteran of the CIA's Directorate of Operations who had left the agency in 1997, Baer observed firsthand how an increasingly bureaucratic CIA lost its way in the post-cold war world and refused to adequately acknowledge and neutralize the growing threat of Islamic fundamentalist terror in the Middle East and elsewhere. A throwback to the days when CIA operatives got results by getting their hands dirty and running covert operations, Baer spent his career chasing down leads on suspected terrorists in the world's most volatile hot spots. As he and his agents risked their lives gathering intelligence, he watched as the CIA reduced drastically its operations overseas, failed to put in place people who knew local languages and

customs, and rewarded workers who knew how to play the political games of the agency's suburban Washington headquarters but not how to recruit agents on the ground. See No Evil is not only a candid memoir of the education and disillusionment of an intelligence operative but also an unprecedented look at the roots of modern terrorism. Baer reveals some of the disturbing details he uncovered in his work, including:

- * In 1996, Osama bin Laden established a strategic alliance with Iran to coordinate terrorist attacks against the United States.
- * In 1995, the National Security Council intentionally aborted a military coup d'état against Saddam Hussein, forgoing the last opportunity to get rid of him.
- * In 1991, the CIA intentionally shut down its operations in Afghanistan and Saudi Arabia, and ignored fundamentalists operating there.

When Baer left the agency in 1997 he received the Career Intelligence Medal, with a citation that says, "He repeatedly put himself in personal danger, working the hardest targets, in service to his country." See No Evil is Baer's frank assessment of an agency that forgot that "service to country" must transcend politics and is a forceful plea for the CIA to return to its original mission—the preservation of our national sovereignty and the American way of life.

An exhilarating spy thriller written by an intelligence veteran about two women CIA agents whose paths become intertwined around a threat to the Russia Division—one that's coming from inside the agency. Lyndsey Duncan worries her career with the CIA might be over. After lines are crossed with another intelligence agent during an assignment, she is sent home to Washington on administrative leave. So when a former colleague—now Chief of the Russia Division—recruits her for an internal investigation, she jumps at the chance to prove herself. Lyndsey was once a top handler in the Moscow Field Station, where she was known as the "human lie detector" and praised for recruiting some of the most senior Russian officials. But now, three Russian assets have been exposed—including one of her own—and the CIA is convinced there's a mole in the department. With years of work in question and lives on the line, Lyndsey is thrown back into life at the agency, this time tracing the steps of those closest to her. Meanwhile, fellow agent Theresa Warner can't avoid the spotlight. She is the infamous "Red Widow," the wife of a former director killed in the field under mysterious circumstances. With her husband's legacy shadowing her every move, Theresa is a fixture of the Russia Division, and as she and Lyndsey strike up an unusual friendship, her knowledge proves invaluable. But as Lyndsey uncovers a surprising connection to Theresa that could answer all of her questions, she unearths a terrifying web of secrets within the department, if only she is willing to unravel it....
