For users familiar with the linux operation system you may proceed to edit the system manually. For users not familiar with linux and ASL, at the Linux CLI (command line interface) Type sudo asl-menu as the example below shows. repeater@repeater:~\$ sudo asl-menu. This will load the AllStarLink configuration menu.

Beginners Guide - "AllStarLink Wiki"

echoing feedback loop causing interference on the repeater. 13.Set your radio to the frequency selected. Apply Rx/Tx CTCSS (PL) tones if desired (recommended). Set the radio to low power. 14.Tune your HT to the same simplex frequency and CTCSS tones for Rx/ Tx. 15.Connect an active Ethernet cable to the Ethernet connector on the Pi.

Allstar Node Setup and Configuration Guide

The node number stanza is the first stanza in rpt.conf. [1999] ; Replace with your assigned node number The node number stanza contains the following key/value pairs. althangtime= This controls the length of the repeater hang time when the alternate hang timer is selected with a control operator function. It is specified in milliseconds. Sample:
