Zimbabwe's guerrilla veterans have burst into the international media as the storm troopers in Mugabe's new war of economic liberation. In this book, Norma Kriger gives the unfolding contemporary drama a historical background, and shows continuities between the present and past. Between 1980 and 1987, guerrilla veterans and the ruling party colluded with and manipulated each other to build power and privilege in the army, police, bureaucracy and among workers. Both relied chiefly on violence and appeals to their participation in the anti-colonial liberation war as they sought to vanquish their then political opponents. Today, violence and a liberation war discourse continue to be salient as Mugabe's party and its guerrilla veterans struggle to maintain power through land invasions and purges of a new political opposition. This study gives a critical review of guerrilla

Eighteen African countries held presidential, primary, or legislative elections in 2011. Elections in eleven of these countries were marked by violence that ranged from low-level intimidation and harassment to more intensely violent displacement and death. Electoral violence of any kind can deter citizens from voting, discourage candidates from running for office, weaken civil society's scrutiny of elections, and hurt the legitimacy of a government. In "Voting in Fear," nine contributors offer pioneering work on the scope and nature of electoral violence in Africa; investigate the forms electoral violence takes; and analyze the factors that precipitate, reduce, and prevent violence. The book breaks new

ground with findings from the only known dataset of electoral violence in sub-Saharan Africa, spanning 1990 to 2008. Specific case studies of electoral violence in countries such as Ghana, Kenya, and Nigeria provide the context to further understanding the circumstances under which electoral violence takes place, recedes, or recurs. Combining issue-driven research with in-depth empirical insights, contributors link electoral violence to past histories of violence, close elections, a state's declining economic fortunes, and weak institutions. Filling a gap in the existing literature on electoral violence, "Voting in Fear" offers concrete recommendations on how international, regional, and local institutions can help reduce or prevent electoral violence. The volume concludes on a hopeful note: Electoral violence is not inevitable, and understanding the political context in which an election takes place is critical to predicting and

The Crisis, founded by W.E.B. Du Bois as the official publication of the NAACP, is a journal of civil rights, history, politics, and culture and seeks to educate and challenge its readers about issues that continue to plague African Americans and other communities of color. For nearly 100 years, The Crisis has been the magazine of opinion and thought leaders, decision makers, peacemakers and justice seekers. It has chronicled, informed, educated, entertained and, in many instances, set the economic, political and social agenda for our nation and its multi-ethnic citizens.

shut out of power when the new regime assumes control. Vasabjit Banerjee first examines why peasants need to ally with dissenting elites in order to rebel. He then shows how conflict resolution and subsequent bargains to form new state institutions re-empower allied elites and re-marginalize peasants. Banerjee evaluates three different agrarian societies during distinct time periods spanning the twentieth century: revolutionary Mexico from 1910 to 1930; late-colonial India from 1920 until 1947; and White-dominated Zimbabwe (Rhodesia) from the mid-1960s to 1980. This comparative approach also allows examination of both the underclass need for elite participation and the variety of causes that elites use to incentivize peasant classes to participate, extending from religious-ethnic identity and common political targets to the peasants' and elites' own economic grievances. This volume examines democracy and elections in Africa, taking stock of the state of constitutional democracy on the continent after the democratic gains of the 1990s and 2000s, focusing on how competitive politics or multiparty democracy can be realized and how, through competition, such politics could lead to better policy and practice outcomes.

context of such conflict in the post-Cold War era, and a recent expansion of knowledge in the field. The committee's main goal is to advance the practice of conflict resolution by using the methods and critical attitude of science to examine the effectiveness of various techniques and concepts that have been advanced for preventing, managing, and resolving international conflicts. The committee's research agenda has been designed to supplement the work of other groups, particularly the Carnegie Corporation of New York's Commission on Preventing Deadly Conflict, which issued its final report in December 1997. The committee has identified a number of specific techniques and concepts of current interest to policy practitioners and has asked leading specialists on each one to carefully review and analyze available knowledge and to summarize what is known about the conditions under which each is or is not
