Hotels near Zsi Museum The ZSI team recorded a nesting giant leatherback female while on survey here, confirming that the site continues to be an important nesting ground of this endangered turtle and the reason why ...

Citizens file RTI applications on Niti Aayog plans for the Andaman & Nicobar islands The carcass of a whale has washed ashore at a beach near West Bengal's Bakkhali on Monday. In the morning around 8.30 am, a huge carcass, around 59 ft long and 22 ft wide, was found at the ...

59ft Whale Carcass Entangled in Fishing Net Washes Ashore In West Bengal's Bakkhali Hence, advancing the sales of stress urinary incontinence. Key Stress Urinary Incontinence market players profiled by Fact.MR include ZSI Surgical Implants, S.R.L, B. Braun Melsungen AG, and Teleflex ...

High Demand for Urinary Catheter to Boost Stress Urinary Incontinence Sales: Fact.MR This is in partnership with BNHS, UNEP, ZSI, Dragonfly South Asia Society, Indian Dragonfly Society, Society of Odinata studies, MIT-WPU University and India Biodiversity Portal. Sohail Madan ...

'Dragonflies are bio-controllers' We have collected its skin samples and spoken to ZSI." "Fin whales avoid polar and tropical waters and semi-enclosed bodies of water," added Sutaria. A foresters said based on the carcass ...

West Bengal: 59ft 'blue whale' carcass washes ashore near Bakkhali The Northeast regional centre (NERC) of the GB Pant National Institute of Himalayan Environment (GBPNIHE) organized a lecture session to mark its annual day here on 10. Jorhat (Assam)-based Rain ...

Lecture session organized High 5! Another late winner, another three points and FC Tulsa's winning streak is alive and well after a 2-1 home v ...

This is the sixth in a series of books detailing the exploits of a group of time travelers attempting to defeat, or at least hold at bay, Yvik Dardarious' Darian Empire. Now they think all is lost-- there is no hope-- the champion defeated. While Draconis Zsi lies helpless on a barren mountain plateau and is now facing an even greater danger the others, not knowing he still lives, mourn him and plan for their own return to their various homeworlds. You and the universe will never be the same--

Book three in the series continues the journey of Johnny and his friends. As they undertake the final battle against the greatest of enemies Ziss, mean boy, mean girl and the Doom boxes!

Impedance Source Power Electronic Converters brings together state of the art knowledge and cutting edge techniques in various stages of research related to the ever more popular impedance source converters/inverters. Significant research efforts are underway to develop commercially viable and technically feasible, efficient and reliable power converters for renewable energy, electric transportation and for various industrial applications. This book provides a detailed understanding of the concepts, designs, controls, and application demonstrations of the impedance source converters/inverters. Key features: Comprehensive analysis of the impedance source converter/inverter topologies, including typical topologies and derived topologies. Fully explains the design and control techniques of impedance source converters/inverters, including hardware design and control parameter design for corresponding control methods. Presents the latest power conversion solutions that aim to advance the role of power electronics into industries and sustainable energy conversion systems. Compares impedance source converter/inverter applications in renewable energy power generation and electric vehicles as well as different industrial applications. Provides an overview of existing challenges, solutions and future trends. Supported by calculation examples, simulation models and results. Highly accessible, this is an invaluable resource for researchers, postgraduate/graduate students studying power electronics and its application in industry and renewable energy conversion as well as practising R&D engineers. Readers will be able to apply the presented material for the future design of the next generation of efficient power electronic converters/inverters.

As a beautiful, young, well-to-do young woman sits upon her family's beach on the shore of a secluded island in the Florida Keys, a man clad in little more than the ancient ocean salt emerges from the waves. Gunther Prien is a young German officer stationed on a cruise ship, and Eola Pinder is little more than putty in his hands. Their encounter leads to the birth of a son, Thomas Luther, who is destined for a life of adventure as he desperately seeks the love of a father throughout some of the worst events Key West and the world have ever seen. Tom's life shapes up to be one adventure after another. He experiences an unlikely rescue as his room goes up in flames around his crib-flames that may have been started by the man Tom believes is his father. He's held hostage during a bank robbery and is nearly swept overboard from the deck of a freighter off Cape Hattaras during a major hurricane. Finally, in the midst of World War II, he finds himself carried away in a German submarine-in the hands of the enemy-by a man who turns out to be his father. In this rich historical novel, an unlikely cast of characters struggles to find the strength to survive not only some of the most horrible tragedies in Florida's history, but some of the most difficult lessons individuals can learn in a lifetime."

From 1889 to 1918 the reports consist of the Report of the director and appendixes, which from 1893 include various bulletins issued by the library (Additions; Bibliography; History; Legislation; Library school; Public libraries) These, including the Report of the director, were each issued also separately.

Global environmental problems, especially global warming caused by the accelerative accumulation of carbon dioxide in the atmosphere, are of great importance for humans. The world's population is now approaching 6 billion, and is still increasing. Developments in communication systems and transportation tools have made the circulation of information, technologies and materials easier, which results in rapid economic growth, particularly in the East and Southeastern Asian countries. Increased affluence leads to an increased consumption of fossil fuels. Inevitably, this leads to an increase in carbon dioxide emission and environmentally hazardous materials which in turn precipitates climatic changes on a global scale. Recent studies showed that the increase in carbon dioxide emission for last year was the highest in the past seven years, and the total amount of carbon dioxide emission from all over the world reached 6.5 billion tons. Furthermore, one cannot overlook the report which appeared recently in Nature, that the floor-area of the iceberg in the South Pole has already decreased by 25% in the past five decades. Over 260 scientists and engineers from 21 countries who had a strong interest and wished to contribute to solve the carbon dioxide problem attended this conference. The papers presented in this volume cover most of the possibilities of the chemical conversion of carbon dioxide.
